

Sealed connectors with an IP rating are an ideal solution for applications exposed to harsh environments.

Adam Tech offers a full range of connectors and cables in all configurations with the following key features:

- IP rated
- Durable
- M8, M12, and coded configurations
 - Sealed ethernet and USB

In addition to the features above, all our harsh environment connectors have been designed with materials capable of withstanding fluctuating temperatures and maintaining performance for long life cycles.

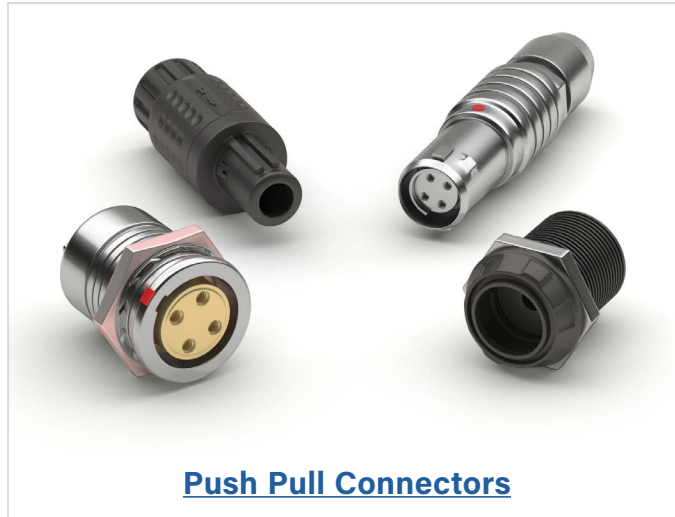

Our design engineering team can assist in designing custom connectors and cable assemblies.

Case Study: Harsh environment sealed M12 assembly for industrial HVAC unit.

Case Study: Custom waterproof assemblies for an underwater robotic tool system. Designed to function under extreme pressure.
